

CiDRA Selected to Receive Breakthrough Product of 2004 Award

Wallingford, CT – January 5, 2005: CiDRA Corporation (“CiDRA”) today announced that it has been selected to receive the Breakthrough Product of 2004 award from *Processing* magazine. The *SONARtrac*™ Process Monitoring System was recognized by the trade publication as a product and technology that has made significant contributions to the process industries within the last year. “This is an outstanding achievement for CiDRA, and thanks to innovations like the *SONARtrac* system, the Breakthrough Products of the Year Award has become one of the most distinguished and well-respected awards in the industry.” said Dennis Van Milligen, Editor-in-Chief at *Processing* magazine.

SONARtrac products include an expanding portfolio of process control systems including the Volumetric Flow Monitoring System, Gas Volume Fraction Monitoring System, the Gas Holdup Meter, Active SONAR meter, Gas Fraction Meter and Total Air Monitor. CiDRA’s *SONARtrac* flow technology is a new class of industrial flowmeter, utilizing measurement principles that are distinct from all other available flowmeter technologies.

Additional information on this award and *Processing* magazine are available at www.processingmagazine.com.
