

## News Release

### **CiDRA Appoints Vice President, General Manager for Oil & Gas Business**

Wallingford, CT – December 14, 2006: CiDRA Corporation (“CiDRA”) has recently appointed Paul Khuri as Vice President and General Manager of the Company’s Oil and Gas business unit to be located in Houston. This appointment is made as CiDRA’s *SONARtrac*™ Surveillance products and services are delivering real time production visibility to its oil and gas customers. *SONARtrac* Surveillance systems deliver a unique value proposition to the oil and gas industry by providing clamp-on flow and gas void fraction measurements in all types of fluid regimes. The integration of real time surveillance of topside process flows is considered by several of CiDRA’s customers to be a cornerstone for enhanced oil recovery from existing assets.

Paul comes to CiDRA with extensive experience in sales leadership and project management in the oil and gas sector. Prior to joining CiDRA, Paul was with Roxar, where he was Regional Manager for the Americas, in the Flow Measurement Division. Prior to Roxar, Paul was Senior Project Manager in the Offshore Systems Division of Cooper Cameron Inc, a leading international manufacturer of oil and gas pressure control equipment, where he was responsible for the profitability, schedule and quality of Cooper Cameron’s major subsea components. Paul led the production team on the first ever all-electric subsea production system - a winner of the 2005 Offshore Technology Conference Spotlight Award.

“We are extremely pleased and excited to have Paul join CiDRA”, said Kevin Didden, President and CEO of CiDRA Corporation. “His leadership experience and track record for providing high levels of sales and service support to the oil and gas industry will enable CiDRA to deliver Surveillance based products and services to enable enhanced oil recovery for our customers.”
