Press Alert

CiDRA to present at the APC 2017 Congress (Advanced Control and Optimization of Metallurgical Processes), to be held in Lima, Peru, at the Belmond Miraflores Park Hotel, Av. Malecón de la Reserva, 1035, Lima.
April 20-21, 2017.

Americo Zuzunaga, CiDRA's Business Development Manager for Peru, will be sharing a presentation titled, ***Grinding and Flotation – A Holistic Approach to Process Optimization.***

Details for this presentation:
Date: Friday, April 2st
Time: 14:00

Americo's presentation will cover the development and application of a new technology that allows mine sites to have a consolidated sample of the overflow of the cyclone battery and to have a representative sample of the product of each individual overflow. Furthermore, Americo will show applications where the using the signals of this instrument, the final product can be optimized for flotation, improving mineral recovery.

CiDRA will also be exhibiting at the event, so please join them at the conference and discuss the advantages and benefits this solution will bring to your process.

This is the second **APC Congress** organized by DEEV SAC. This year's congress aims to go more in-depth into topics on innovation in advanced control and process optimization, and is a platform where participants can learn and share best practices in order to improve efficiency in their respective operations.
