

Wallingford, Connecticut, USA—October 20, 2016

Yokogawa to Distribute CiDRA's Line of *SONARtrac*® Flow and Entrained Air Measurement Systems in Southeast Asia, Middle East, and Korea

Yokogawa Electric Corporation and CiDRA Corporate Services Inc. announce that they have entered into a distributor agreement. Yokogawa will sell CiDRA's *SONARtrac*® range of flowmeters in the Southeast Asian markets of Malaysia, the Philippines, Singapore, Thailand, Vietnam, and Indonesia; the Middle Eastern markets of Bahrain, Egypt, Kuwait, Oman, Qatar, Saudi Arabia, and the UAE; and the Republic of Korea. Yokogawa Australia, Yokogawa New Zealand, and CiDRA have been successfully working together since 2014, so this agreement will now extend coverage to include Southeast Asia, the Middle East, and Korea.

CiDRA's line of *SONARtrac* flowmeters provides accurate and reliable flow and entrained air measurements for mining applications, as well as most other industrial applications. Due to their non-contact design, *SONARtrac* flowmeters do not have any moving or process-wetted parts that are subject to wear. They also do not have inherent drift mechanisms, and can be installed on the outside of any type of pipeline. This non-contact design translates into long life, no maintenance, improved safety, and enhanced operational and process efficiency for the monitoring of mining flow processes.

Kersi Aspar, a Yokogawa vice president and head of the Global Sales Center at the company's IA Platform Business Headquarters: “Yokogawa has an extensive flowmeter lineup that includes vortex, magnetic, clamp-on ultrasonic, and Coriolis flowmeters. Based on our two years' experience selling *SONARtrac* in Australia and New Zealand, we believe that its unique sonar-based non-contact flow and entrained air measurement systems nicely complement our flowmeter lineup, and enhance the portfolio of industry leading products and solutions that we provide to the Southeast Asian, Middle Eastern, and Korean markets. This will enable us to expand into the mining, chemical, refining, coal processing, power, and other markets.”

John Viega, CiDRA's vice president of Global Sales: "We are extremely pleased to build upon our existing relationship with Yokogawa. Yokogawa is widely recognized as a leader in high quality and innovative technology and solutions, and very much like CiDRA, has a steadfast commitment to customer requirements for safety and operational and process efficiency."

About Yokogawa

Yokogawa's global network of 92 companies spans 59 countries. Founded in 1915, the US\$3.7 billion company engages in cutting-edge research and innovation. Yokogawa is active in the industrial automation and control (IA), test and measurement, and aviation and other businesses segments. The IA segment plays a vital role in a wide range of industries including oil, chemicals, natural gas, power, iron and steel, pulp and paper, pharmaceuticals, and food.
