

Press Alert

CiDRA Minerals Processing Inc. to present at the 5th APC Conference – Optimization, Innovation, and Digital Transformation for Metallurgical Processes – which will be held for the first time virtually.

July 1st and 2nd, 2021.

Luis Panduro Robles, Director of Business Development for CiDRA Minerals Processing in Peru, will be sharing a presentation co-authored with Kyle Wiese of Cerro Verde, titled, ***Integration of Real-Time, Online, Individual Cyclone Measurement Technology at Cerro Verde: Challenges and Lessons Learned.***

Details for this presentation:

Date: Thursday, July 1st

Time: 10:30 a.m. (Lima local time)

Additionally, Alessandra Castillo, from the Global Sales and Marketing group at CiDRA Minerals Processing, U.S.A., will be present on the topic of ***Leveraging an Innovative and Unique Particle Size Measurement Technology in Copper Concentrators: Transforming Data into Actionable Information and Knowledge.***

Both presentations explore the challenges that mining operations can face when implementing new technology and provide some solutions to innovate successfully and reach new heights. Mr. Panduro and Mr. Wiese's presentation will analyze the lessons learned with the implementation of CYCLONetrac™ PST at Cerro Verde key factors for this project to meet all of the quantifiable goals, with hope that other operations can take their learning into consideration when adopting new technology into their own processes. Ms. Castillo's presentation will focus on the different control strategies that mines can consider to maximize their economic benefits and Net Metal Production (NMP), as well as tangible results from operations that have been able to leverage data provided by truly innovative technology in order to optimize their grind circuit.

APC Peru aims to bring national and global experts together that are directly involved in the optimization, innovation, and digital transformation of their metallurgical processes, specifically in advanced process control. CiDRA Minerals Processing will also be exhibiting with their virtual booth during this event, so please join us to review and download materials, as well as to discuss the advantages and benefits this solution will bring to your process through the live chat function.
