

Wallingford, CT – January 07, 2019

iKontrol to Represent CiDRA’s Line of *SONARtrac*® Flow and Entrained Air Measurement Systems in Turkey

CiDRA (“CiDRA”) announced that it has entered into a channel partner agreement with iKontrol, based in Izmir, Turkey. iKontrol will be one of the representatives of CiDRA’s *SONARtrac*® range of flow meters in the European minerals processing sector. This extension of coverage aligns well with CiDRA’s strategy for growth in this region and commitment to provide process optimization solutions and support across Europe.

CiDRA’s line of *SONARtrac* process flow measurement systems provide accurate and reliable flow measurements for mining applications, as well as other industrial process applications. Their non-contact design translates into long life, no maintenance, no recalibration, improved safety, and enhanced operational effectiveness for the monitoring of industrial flow processes. CiDRA’s *SONARtrac* model VF/GVF system with Phase Fraction Management (PFM), provides a unique dual measurement capability, flow and air content (gas void fraction) in slurries and fluids leading to effectively supporting an operation’s production and recovery initiatives.

Sebati Yilmaz, Managing Director of iKontrol, said “the opportunity to represent CiDRA and their *SONARtrac* technology is excellent, as it will allow both companies to be able to reach and support a wider range of minerals processing applications and properly support customers to successfully implement process optimization technologies.”

Ralf Dopieralla, CiDRA’s regional director for Europe, is very pleased to have iKontrol on board. “iKontrol has a proven track record of providing customers with effective solutions using process control systems and instruments from the world’s leading manufacturers, and their technical knowledge and support align very well with CiDRA’s dedication to world-class service and support.”

About CiDRA

Headquartered in Wallingford, Connecticut, USA, with an increasing international presence, CiDRA is a trusted partner and leading supplier of highly differentiated process optimization and enhanced recovery solutions and services to the global mining sector, as well as other industrial markets. CiDRA's products and services are being used by more than 400 mining and other locations in over 45 countries, enhancing process control and material recovery.

SONARtrac is a registered trademark of CiDRA.

About iKontrol:

Backed by 40 years of experience across industries such as: oil & gas, chemical, iron & steel, minerals processing, and power industries, iKontrol brings its customers together by providing cutting edge technologies and premium services. Being the representative of the world's leading instrumentation and process automation suppliers, iKontrol is able to support industrial processing plants to reach operational excellence using equipment from their diverse portfolio of solutions along with their consulting, engineering, installation, commissioning, and training services.
